

ABER DAISY DESIRE

aberdaisy37@gmail.com

I am a Bachelor of Medical Laboratory Technology (BMLT) student at ISBAT University with a passion for public health, community development, and women's empowerment. I believe that leadership is about creating opportunities for others, especially those whose voices often go unheard.

Throughout my academic journey, I have developed strong analytical, communication, teamwork, and problem-solving skills through laboratory training, research, and collaborative projects. My experiences have strengthened my desire to use science and leadership to improve the health and well-being of communities.

Beyond my studies, I am passionate about mentoring and supporting girls and young women. My long-term vision is to pursue a Master's degree in Public Health and contribute to developing sustainable health and social interventions that empower vulnerable communities.

One of the initiatives I hope to implement is *The NurHer Initiative (Nurture-Her Initiative)*, a platform where girls and women can openly or anonymously share their personal, academic, social, and mental health challenges while receiving guidance, mentorship, and encouragement from experienced role models. I envision this platform as a safe, judgment-free community that promotes confidence, resilience, and informed decision-making.

Core Skills

- Leadership and teamwork
- Communication and public speaking
- Research and critical thinking
- Medical laboratory practice
- Community engagement
- Problem-solving
- Digital literacy

Interests

- Public health
- Microbiology
- Women's leadership and empowerment
- Community service
- Health education and advocacy
- Mentorship

Vision

To become a public health leader who combines scientific knowledge, compassionate leadership, and community engagement to improve health outcomes while empowering girls and young women to realize their full potential.
